Ad details

Ref. number: GOO170118

Common

Condition: New
 Price: 33,25 BGN

Description:

POLYTRON penetrating lubricant contains POLYTRON MTC and is scientifically blended to be most effective when corrosion and scraping are a problem.

This product has no equal in the entire world where rust, corrosion or butt drag are important factors.

POLYTRON PL not only penetrates through extreme corrosion and rust, but also treats metal surfaces with a polarized layer of lubricating molecules to reduce friction and wear and prevent future corrosion. The use of this product ensures long-term and smooth operation of any metal mechanism. The number of applications and benefits are far more than any other existing product (POLYTRON PL is at least 20 times more effective than WD-40). The lubricant can be used for the simplest domestic uses as well as the most complex and heavy industrial applications. POLYTRON PL is highly recommended for standard metalworking activities such as milling and profiling.

Features:

- fast penetration
- rust protection and corrosion removal
- speeding up drilling with a drill bit and making screw grooves
- tool cutting elements stay sharp longer
- when used as a lubricant reduces the consumption rate
- reduces noise
- eliminates wear
- lubricates and protects when penetrating the material
- cleans and prevents electrical corrosion

- does not contain chlorofluorocarbons (CFCs)
- replaces speciality lubricants with one multifunctional product

General Applications:

- Sliding doors and windows
- hinges and locks
- valves and chains
